Our Brands

### Brands We Offer

Arcluce

Arcluce

Our architectural range has been sourced from Italian manufacturer Arcluce. Carefully chosen to meet the most demanding requirements of lighting designers, architects and end users, these products feature high-quality European design and craftsmanship, backed

### **Cree Lighting**

**CREE ‡** LIGHTING

Cree Lighting is a global, market-leading developer of LED lighting products. Cree Lighting have been at the forefront of LED technology for over 25 years and continue to introduce new and exciting innovation through research and development. Advanced Lighting Technologies are the sole authorised distributor of Cree Lighting products in Australia.

### **Arianna**

by a 5 year guarantee.

Arianna is an Italian company, specialising in designing and manufacturing LED lighting systems. The patented optics found in the Arianna Petrarca LED floodlight offer high-mast illumination with high efficiency, uniformity and visual comfort.

### **DimOnOff**

Considered a pioneer and innovator in wireless control and remote monitoring technology, DimOnOff's platform is a result of over 10 years of research aimed at creating the ultimate energy monitoring and management system.

### Holophane

### **PRACHT**

**PRACHT®** 

For over 120 years the name Holophane has enjoyed an enviable reputation throughout the world for expertise, quality and innovation. Holophane remains synonymous with high performance, low maintenance and cost-effective lighting. Their product portfolio incorporates interior, amenity, street and floodlighting suitable for today's environmentally conscious world.

### With a wide range of luminaires featuring precise German engineering, PRACHT are considered the specialists when it comes to efficient and effective illumination under extreme conditions. PRACHT offer luminaires designed to withstand extreme temperatures, vandalism, chemical vapours, hazardous areas and more.

### **Orca Solar Lighting**

### **Survivor Lighting**

(SURVIVOR)

Orca Solar Lighting are the experts in solar lighting, designing and building solutions specifically for Australian conditions. Advanced Lighting Technologies are pleased to offer Orca Solar Lighting's range of solar pole-mounted luminaire systems in select states.

Survivor Lighting are the experts in creating robust linear-extruded luminaires designed to thrive in the most challenging environments. Every system is manufactured in Australia using high-quality materials. Advanced Lighting Technologies are proud to be the exclusive distribution partner of Survivor Lighting products in Victoria & Tasmania.

# Decorative Poletops

Perfect for parks, forecourts and other urban spaces, our stunning range of poletops and bollards combine performance and aesthetics to offer a lighting solution that impresses both night and day.

Many offer high impact resistance ratings to withstand the challenges of the urban environment.

### **Area & Street**

To meet the demands of modern area and street lighting, we offer low, medium and high wattage LED luminaires with a range of optical distributions.

Our in-house lighting design service can also ensure compliance with the relevant Australian standards.

## **Engineered To Exceed Expectations**

The Energy Series from Cree Lighting has been designed as a complete street lighting system, offering extraordinary efficiency across multiple lumen packages and a complete optical range.

The perfect product for urban applications, the Cree Lighting Energy Series delivers both performance and ease of installation without sacrificing style.

The Energy Series offers a fresh approach for the street and area lighting market - an efficient, modular luminaire family that offers future-proof connectivity, multiple control options, simple installation that was designed with recyclability in mind.

# **Canopy & Parking**

Anywhere vehicles and people come in close contact with each other has the potential to be unsafe. Costly litigation can be avoided by providing an effective lighting solution that allows for safe movement of motorists and pedestrians.

An improved lighting solution can also improve security and make a car park or petrol station appear more inviting.

Explosion proof luminaires are essential in environments where the presence of flammable gases and vapours or ignitable dust and fibres could create a hazardous atmosphere. Such luminaires are designed to prevent and control the risk of ignition of these potentially combustible materials, ensuring higher safety.

**≯** IK10

**3** -30°C TO +50°C

Gecko is PRACHT's first LED explosion proof luminaire, and has been specifically developed for use in hazardous areas. Gecko offers impact resistant splinter protection, optimised thermal management and special electronics to prevent flammable gases or dust from igniting. Gecko is IECEx & ATEX certified.

## **Speciality & Legacy**

Cree Lighting have a proven track record over many years of providing reliable, efficient and robust LED lighting solutions. Some of these luminaires boast a well-earned reputation, but are now closer to the end of their life cycle than the beginning. Advanced Lighting Technologies will continue to offer limited quantities of these products to your projects until our supplies are exhausted, however we recommend considering modern alternatives where possible. Contact us for more information today.
