

ONE
TO BE DIFFERENT

ONE

The KATLA ONE is a new beginning: for industry, commerce and private users. The ONE is a statement for sustainability with concentrated lighting expertise from PRACHT.

One hundred percent made of recycled material, with ONE-single replaceable driver and circuit board, ONE metre long and ONE uniquely customisable. ONE luminaire for many applications. A real ONE.

REMADE

It is time for an important realization: old plastic is not waste, but a significant resource. Recycled material is the most important raw material of a future-oriented, new world. The ONE proves that PRACHT luminaires made of recycled materials offer excellent quality and meet high technical requirements - and that this is price-neutral compared to conventional plastics! For the material technology REMADE, PRACHT was even awarded as a Champion for Innovation. PRACHT stands for the development and production of sustainable luminaires in Germany: REMADE MADE IN GERMANY
