

## Victoria Square Public Space

Footscray is a vibrant suburb found five kilometres west of Melbourne's central business district. Known for its rich cultural diversity and eclectic dining scene, Footscray offers a dynamic blend of old-world charm and modern urban living.

Victoria Square Apartments provides a snapshot of the changing face of Melbourne's inner west - built on a former commercial site, the mixed-use development will eventually total six towers featuring offices, retail and over one thousand apartments.

A public space provides access to businesses on the northern side of tower one and two. Adequate illumination along the pathways and ramps was needed to ensure safety, security and accessibility for pedestrians.

**Advanced Lighting Technologies supplied the elegant Arluce Soul180 Urban Bollard,** providing high-quality illumination while complementing the aesthetic of the development.

Built tough to withstand the urban environment and standing 3.5m tall, the Soul180 Urban was supplied with a warm correlated colour temperature of 3000K, projecting an inviting atmosphere across the walkways and open spaces at Victoria Square.

Advanced Lighting Technologies also provided the Arluce Tito55 Spiked Floodlight to illuminate trees throughout the space, bringing an added sense of sophistication to the complex's modern look and feel.

### END USER

Residents and Visitors

### LOCATION

Footscray, VIC

### ELECTRICAL CONTRACTOR:

Acton Electrical

### CHALLENGES

- Provide sufficient illumination along pathways and ramps
- Ensure practical luminaire placement
- Consider elevation changes across the site

### SOLUTIONS

- Arluce Soul180 Urban Bollard
- Arluce Tito55 Spiked Floodlight

### RESULTS

- Desired light levels achieved
- Fittings blend seamlessly into their surroundings

## Arcluce

# Soul180 Urban

LED BOLLARD

Featuring radial optics that produce comfortable, diffused lighting, the Arcluce Soul180 Urban Bollard is the ideal choice for illuminating pathways, squares and other public spaces.

With its sleek lines and modern technology, the Arcluce Soul180 Urban Bollard offers a design that stands out yet fits in, perfect for promenades, pedestrian areas, city parks, pathways and more.
